

Speed-Grip 2 – The winter athlete

Technical Highlights

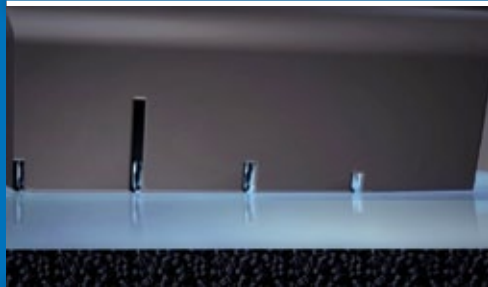

Improved performance on snow

- Additional gripping edges ensure improved interlocking of the tyre on snowy road surfaces.

Your advantage: increased grip when accelerating and braking.

Very good braking on ice

- Optimal scraping edges through straight sipes design in the centre section.

Your advantage: best braking performance on icy road surfaces.

Good dry handling

- Interwoven block structure for strong supporting effect with longitudinal and lateral forces.

Your advantage: sporty driving experience on dry road surfaces.

Semperit – alpine proven. With good reason!

For over 70 years the Semperit brand has stood for modern winter tyres.

The origins of the brand in Austria give credence to its “alpine proven” quality claim, which promises maximum safety even under the most extreme alpine conditions. Serpentine, steep gradients and changing weather conditions in high mountainous regions place tough demands on tyres in terms of grip during braking and setting off.

Good marks in the test reports published by the trade press confirm that you can rely on Semperit winter tyres.

NEW!

Speed-Grip 2 – The winter athlete

For fast, sporty passenger cars and SUVs
15" to 18" – series 70 to 40 – T/H/V (up to 240 km/h)

- **NEW: 3-phase high performance compound**
Optimised rubber compound for balanced stiffness in mixed conditions in the winter.
- **Improved performance on snow**
- **Very good braking on ice**
- **Good dry handling**

Master-Grip – The superior performer

For compact class vehicles
13" to 15" – series 80 to 55 – T (up to 190 km/h)

- **Optimised stiffness**
Even wear and high mileage performance.
- **Anti-frost rubber compound**
Consistently high grip in snow and ice throughout the entire service life.
- **Network sipes technology**
Excellent traction due to numerous gripping edges.

Van-Grip – The load-bearer

For vans, minibuses and transporters
14" to 16" – LI to 121/120 – O/R/T (up to 190 km/h)

- **Wide circumferential grooves**
High aquaplaning protection.
- **Numerous transverse edges and sipes**
Excellent traction in snow and ice.
- **Wide tread contour**
Even wear for higher mileage performance.
