Speed-Grip 2 – The winter athlete

A 3-phase high performance compound resistant against temperature variations provides a convincing performance on icy, wet and dry road surfaces.

Improved performance on snow

- Additional gripping edges ensure improved interlocking of the tyre on snowy road surfaces.

Your advantage: increased grip when accelerating and braking.

Very good braking on ice

- Optimal scraping edges through straight sipes design in the centre section.

Your advantage: best braking performance on icy road surfaces.

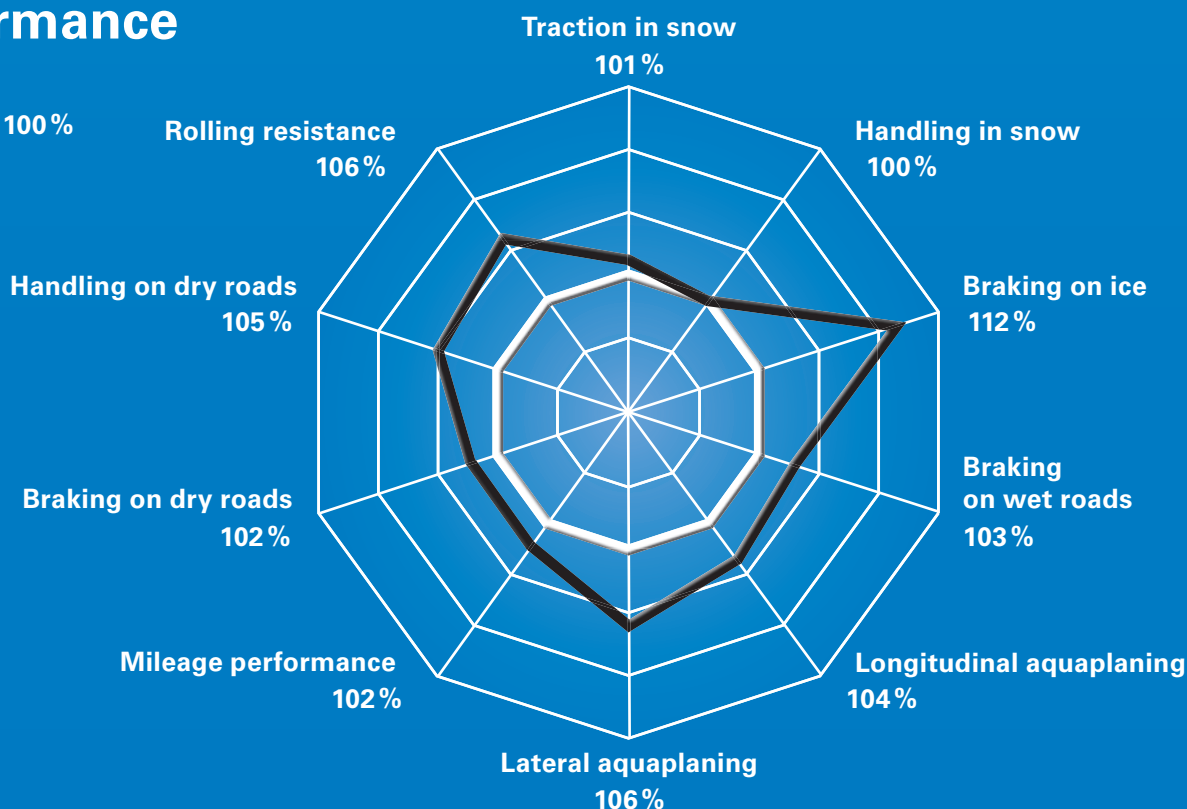

Good dry handling

- Interwoven block structure for strong supporting effect with longitudinal and lateral forces.

Your advantage: sporty driving experience on dry road surfaces.
